Objective

I am a MCA student with solid foundation in programming language in react frontend, also have basic knowledge of backend I'm passionate about learning new technologies and applying my skills in real world project Seeking an internship and placement to gain practical experience and contribute to innovative projects

Education

- **D.A.V Hindi vidhyalaya** 2019
  10th
  72.33%
- **Sanskar Vidya sankul** 2022
  12th
  42.59%
- **Udhna citizen college** 2025
  Bachelor of computer application (BCA)
  6.33
- **Veer Narmada South Gujarat University (VNSGU)** 2026
  Master of computer application (MCA)
  1st year completed

Skills

- Problem solving
- Decision making
- HTML
- React.js
- PHP
- SQL
- C

Projects

- **Tour and Travel Management System**
  This project is a modern web-based Tour and Travel Management System designed to simplify the process of planning, booking, and managing travel services. The application provides users with an intuitive interface to explore tour packages, view destinations, and make bookings and efficiently.
  The frontend is developed using React.js, ensuring a fast, responsive, and user-friendly experience with dynamic UI components.
  The backend is built with Laravel, which handles business logic, user authentication, booking management, and secure API integration.
  For data storage, MongoDB is used, providing flexible and scalable database management for storing user details, travel packages, and booking information.
- **The E- literate library**
  This project is a modern web-based Online Bookstore Management System designed to provide users with a seamless platform to browse, search, and purchase books and efficiently. The system offers an interactive interface where users can explore a wide range of books, view details, and manage their purchases.
  The frontend is developed using React.js, delivering a fast, responsive, and dynamic user experience with reusable UI components.
  The backend is built using Node.js and Express.js, which handle server-side logic, API development, user authentication, and order management efficiently.
  For database management, MongoDB is used, allowing flexible and scalable storage of book details, user data, and order information.

Interests

- Reading novels
- Teaching
- Gym
